

SE- Introduction to Web Technologies - HTML and CSS

Session 1: Introduction to Web Design
Coverage: How browsers render HTML + CSS. Difference between front-end & back-end. Developer tools overview (Chrome DevTools). Demo: Inspect elements on Instagram home page. Depth: Conceptual understanding of DOM structure.

Task :

Question :- 1

Open Instagram's home page in Chrome, right-click on a post image, and use Inspect Element to find the exact HTML tag and CSS class used for the image container. Write down the tag name and class.

Ans:-

Tag Name:-

img tag

Class Name:-

x5yr21d xu96u03 x10l6tqk x13vifvy x87ps6o xh8yej3

Description:-

Using Chrome DevTools, I inspected an Instagram post image and found that the image is displayed using the HTML tag. The CSS classes applied to the image are x5yr21d xu96u03 x10l6tqk x13vifvy x87ps6o xh8yej3.

Question :- 2

Create a simple HTML file named myprofile.html that displays your name, a short bio, and a profile picture using appropriate HTML tags (h1, p, img). Open it in your browser and view the result.

Ans:-

```
<!DOCTYPE html>

<html>

  <head>

    <title>My Profile</title>

  </head>

  <body>

    <h1>Harsh Dav</h1>

    <p>

      Hello! My name is Harsh Dav. <br>

      I am currently learning Full Stack Development at TOPS Technologies.

      <br>

      I enjoy web development, trading, and learning new technologies.

    </p>

    

  </body>

</html>
```

Question :- 3

Use Chrome DevTools to change the background color of your name (in myprofile.html) to any color you like, live in the browser, without editing the HTML file.

Ans:-

I opened myprofile.html in Google Chrome and used Chrome DevTools to inspect the <h1> element containing my name. In the Styles panel, I added the CSS property:

```
background-color: lightblue;
```

The background color of my name changed successfully in the browser without editing the original HTML file.

Question :- 4

Draw a diagram or write a list showing the DOM structure (parent-child relationships) of your myprofile.html page. Include at least 3 levels (html > body > your content).

Ans:-

Parent-Child Relationships:

1. html is the root element.
2. head and body are children of html.
3. title is a child of head.
4. h1, p, and img are children of body.

DOM Structure:
