

SE- Introduction to Web Technologies - HTML and CSS

Session 3: Forms & Inputs
Coverage: Form elements (input, select, textarea), labels, validation attributes.
Demo: Registration form for Social Bio Link App.
Depth: Show POST request preview in DevTools Network tab.

Task :

Question :- 1

Create an HTML form for a Flipkart-style product review, including input fields for username, rating (as a dropdown from 1 to 5), and a textarea for the review message. Use appropriate labels for each field.

Ans:-

```
<!DOCTYPE html>

<html lang="en">

<head>

  <meta charset="UTF-8">

  <meta name="viewport" content="width=device-width, initial-scale=1.0">

  <title>Review Form</title>

</head>

<body>

  <form>

    <label for="username">Username:</label>

    <input type="text" id="username" name="username">

    <br><br>

    <label for="rating">Rating:</label>

    <select id="rating" name="rating">

      <option value="1">1 Star</option>
```

```

    <option value="2">2 Stars</option>
    <option value="3">3 Stars</option>
    <option value="4">4 Stars</option>
    <option value="5">5 Stars</option>
</select>

<br><br>

<label for="review">Review:</label><br>

<textarea id="review" name="review"></textarea>

<br><br>

<input type="submit" value="Submit Review">

</form>

</body>

</html>

```

Question :- 2

Add HTML5 validation attributes to your review form so that username is required, rating must be selected, and the review message must be at least 20 characters long.

Hint: Use required, minlength, and a default unselectable option for the dropdown.

Ans:-

```

<!DOCTYPE html>

<html lang="en">

<head>

    <meta charset="UTF-8">

    <meta name="viewport" content="width=device-width, initial-scale=1.0">

    <title> Review Form </title>

</head>

<body>

```

```
<form>

  <label for="username">Username:</label>

  <input type="text" id="username" name="username" required>

  <br><br> <label for="rating">Rating:</label>

  <select id="rating" name="rating" required>

    <option value="" selected disabled>Select Rating</option>

    <option value="1">1 Star</option>

    <option value="2">2 Stars</option>

    <option value="3">3 Stars</option>

    <option value="4">4 Stars</option>

    <option value="5">5 Stars</option>

  </select>

  <br><br>

  <label for="review">Review Message:</label><br>

  <textarea id="review" name="review" minlength="20" required></textarea>

  <br><br>

  <input type="submit" value="Submit Review">

</form>

<br>

<em>

  <strong>Validation Applied:</strong>

</em>

<ul>

  <li>Username is required.</li>

  <li>Rating must be selected.</li>

  <li>Review message must contain at least 20 characters.</li>

</ul>

</body>
```

</html>

Question :- 3

Modify your form to use the POST method and, after submitting a test review, open the DevTools Network tab to preview the POST request data sent by your form.

Hint: Look for the form submission request and expand the payload/details to see your input values.

Ans:-

```
<!DOCTYPE html>

<html lang="en">

<head>

  <meta charset="UTF-8">

  <meta name="viewport" content="width=device-width, initial-scale=1.0">

  <title>Review Form</title>

</head>

<body>

  <form method="post">

    <label for="username">Username:</label>

    <input type="text" id="username" name="username" required>

    <br><br> <label for="rating">Rating:</label>

    <select id="rating" name="rating" required>

      <option value="" selected disabled>Select Rating</option>

      <option value="1">1 Star</option>

      <option value="2">2 Stars</option>

      <option value="3">3 Stars</option>

      <option value="4">4 Stars</option>

      <option value="5">5 Stars</option>

    </select>
```

```

<br><br>

<label for="review">Review Message:</label><br>

<textarea id="review" name="review" minlength="20" required></textarea>

<br><br>

<input type="submit" value="Submit Review">

</form>

<br>

<em>

    <strong>Validation Applied:</strong>

</em>

<ul>

    <li>Username is required.</li>

    <li>Rating must be selected.</li>

    <li>Review message must contain at least 20 characters.</li>

</ul>

</body>

</html>

```

Question :- 4

Build a Zomato-style food order form with inputs for user name, a select dropdown for food item (at least 3 options), quantity (number input), and a textarea for delivery instructions. Ensure all fields are labeled and use required validation.

Ans:-

```
<!DOCTYPE html>

<html>

<head>

  <title>Zomato Food Order Form</title>

</head>

<body>

<h2>Zomato Food Order Form</h2>

<form>

  <label for="name">Customer Name:</label>

  <input type="text" id="name" name="name" required>

  <br><br>

  <label for="food">Food Item:</label>

  <select id="food" name="food" required>

    <option value="" selected disabled>Select Food Item</option>

    <option value="Pizza">Pizza</option>

    <option value="Burger">Burger</option>

    <option value="Pasta">Pasta</option>

    <option value="Sandwich">Sandwich</option>

  </select>

  <br><br>

  <label for="quantity">Quantity:</label>

  <input type="number" id="quantity" name="quantity" min="1" required>
```

```

<br><br>

<label for="instructions">Delivery Instructions:</label><br>

<textarea id="instructions" name="instructions"></textarea>

<br><br>

<input type="submit" value="Place Order">

</form>

</body>

</html>

```

Question :- 5

Add a disabled input field to your food order form that displays a fixed order ID (e.g., ORD12345) and explain in a comment why this field should be disabled for users.

Ans:-

```

<!DOCTYPE html>

<html>

<head>

  <title>Forms & Inputs Assignment</title>

</head>

<body>

  <h1>Zomato Food Order Form</h1>

  <form>

    <label for="orderid">Order ID:</label>

    <input type="text" id="orderid" name="orderid" value="ORD12345"
disabled>

    <br><br>

    <label for="name">Customer Name:</label>

    <input type="text" id="name" name="name" required>

```

```
<br><br>

<label for="food">Food Item:</label>

<select id="food" name="food" required>

  <option value="" selected disabled>Select Food Item</option>

  <option value="Pizza">Pizza</option>

  <option value="Burger">Burger</option>

  <option value="Pasta">Pasta</option>

  <option value="Sandwich">Sandwich</option>

</select>

<br><br>

<label for="quantity">Quantity:</label>

<input type="number" id="quantity" name="quantity" min="1" required>

<br><br>

<label for="instructions">Delivery Instructions:</label><br>

  <textarea id="instructions" name="instructions" rows="4"
cols="30"></textarea>

  <br><br>

  <input type="submit" value="Place Order">

</form>

<!--

The Order ID field is disabled because it is generated automatically by the
system.

Users can view the Order ID but cannot modify it.

This helps maintain data accuracy and prevents accidental changes.

-->

</body>

</html>
```
